Approval for Renewal of Advanced Metering Infrastructure (AMI) Software License Agreement

Lori Mueller I Vice President, Head of Technology and Digital Strategy
Sean McCoy I Director, Technology Portfolio Management

Aclara: AMI Metering Software

- Aclara provides critical metering infrastructure, software and services to PEC.

  - This includes all the physical meters at PEC member service locations, as well as our meter data collectors and systems throughout our service territory.

- Given the critical nature of the software, PEC management requests authorization to extend software maintenance services for 5 years.
